

Agreed Performance Statement

The ACHS strongly believes in the public availability of appropriate information resulting from accreditation surveys, and is actively encouraging all members to make this information available to interested parties, most notably consumers. As part of our public disclosure initiative the ACHS survey team provides an Agreed Performance Statement (APS) to be placed on the ACHS website. The member organisation may also provide an APS to be placed on the website. The APS should include reference to strengths and/or weaknesses identified during survey.

Name of member organisation:	Belmont Private Hospital
Org Code :	721759
Date :	11-13 April 2018

Organisation's Comments

Belmont Private Hospital, which was established 45 years ago, is a 150-bed mental health hospital, situated at the top of a steep hill in a beautiful bushland setting, just south of Brisbane. Since the last survey, there have been many changes made which improve both patient care, but also the management of daily operations. The committee structure was modified to align with the changes that had already been made to the hospital governance and organisation structure. Memoranda of Understanding (MOUs) have been signed with:

1. The Wesley Private Hospital Commissioning Consultation Liaison Psychiatry services for maternity, medical and medical rehab units;
2. The Sunnybank Private Hospital to allow Belmont to provide Consultation Liaison Psychiatry services at the hospital with a focus on maternity, medical rehabilitation and medical units;
3. The Brookred peer support lead non-government organisation providing community-based peer support workers for consumers; and
4. Department of Veteran Affairs (DVA) approval was obtained for Post-Traumatic Stress Disorder (PTSD), Cognitive Behavioural Therapy (CBT) and Additional Day programs to be provided.

A recent initiative of the service has been the development of acute community services. This service is targeted for those who can be supported in their homes, who otherwise may require an admission.

This organisation provides an impressive range of therapeutic interventions for both inpatients and outpatients. These include art therapy, music therapy, yoga and exercise classes. The range of psycho dynamic therapies include targeted Cognitive Behavioural Therapies, Dialectical Behaviour Therapies, Addictions recovery, Triple P (positive Parenting), trauma and dissociation, Addictions first step and Trauma Recovery for Veterans to name but a few. Many of these are offered at different times of the day and evening with attendance at some reserved for a select group.
